

Improve Patient Outcomes and Practice Profitability!

Outsource Chronic Care Management

Why Remote Care for Your Practice

- Serve patients at no cost to your practice
- Improve patient care and outcomes
- Reduce staff workload
- Significantly increase practice profitability

Complete turnkey solution including billing

Why Remote Care for Your Patients

Keeping Track of Your Patients:

Simple fact: Physicians don't know how their patients are doing when outside of their practice walls. Imagine the improvement in care if your office was alerted to changes in vitals, as well as frequent verbal communications between our medical professionals and your patients between office visits. (We also encourage regular appointments at your office.)

Early Intervention:

Continuous monitoring through RPM and CCM helps identify potential health issues early. Vital sign and symptom tracking enable timely detection of condition changes, allowing for prompt intervention. This proactive approach lessens complications, reduces emergency

Reduced Exposure Due to In-Person Visits:

RPM and CCM provide healthcare providers with real time updates on a patient's health, reducing the need for in-office visits, thereby reducing patient and staff exposure to potential infections.

Enhance Healthcare Access in Rural Areas:

RPM and CCM enhance healthcare access for individuals in remote or underserved areas. Patients can receive convenient care without the need to travel long distances or arrange transportation.

Why Remote Care and Coaching for Your Patients:

Health and wellness coaching helps your patients be engaged in making lifestyle changes to proactively manage their chronic conditions between office visits, thus improving their health and wellbeing.
